Survey

Are you a Secondary Investigator or Analyst (SIA) who works with violent, sexually violent, or other traumatic material?

We are leading a research study investigating the impact of exposure to traumatic material on the wellbeing of police and law enforcement staff.

We are inviting both neurotypical and neurodivergent SIAs to complete an online survey about their work, wellbeing, and experiences, which takes approximately **35 minutes** to complete. A formal diagnosis is not required.

Please use the link below to access the online survey:

Interviews and Focus Groups

Are you a Secondary Investigator or Analyst (SIA) who works with violent, sexually violent, or other traumatic material?

We are leading a research study investigating the impact of exposure to traumatic material on the wellbeing of police and law enforcement staff.

We are inviting neurodivergent SIAs to complete an interview or a focus group about their work, wellbeing, and experiences, which will take approximately **45-60 minutes** to complete. A formal diagnosis is not required.

Interviews will be one-to-one and focus groups will involve five or six professionals. They can be held online, telephone, or another agreed method.

Reasonable adjustments are available and can be provided by contacting the research team.
